

Video Prediction

Flip the die: There is a **die** on the **unseen table** in front of the **unseen cupboard**. The robot is instructed to flip the die to orient face one upward using its right arm. The robot needs to: (0) **identify the single-pip face**, (1) **secure its hold on the die**, (2) **flip the die** as required.

Wipe the table with rag: There is a **rag** on the table. The robot is instructed to wipe table with rag using its right arm. The robot needs to: (0) **identify the rag and predict its motion trajectory**, (1) **secure its hold on the rag**, (2) **move the rag leftward and rightward** to wipe table as required.

Stack the bowl on steamer: There is a **pink bowl** and a **steamer** on the **unseen table** in front of the **unseen cupboard**. The robot is instructed to stack the bowl on steamer using its left arm. The robot needs to: (0) **align the grippers with the edge of the bowl**, (1) **secure its hold on the bowl**, (2) **move the bowl onto the steamer**.

Stack the bowl on steamer (failure): There is a **pink bowl** and a **steamer** on the **unseen table** in front of the **unseen cupboard**. The robot is instructed to stack the bowl on steamer using its left arm. The robot needs to: (0) **align the grippers with the edge of the bowl**, (1) **secure its hold on the bowl**, (2) **move the bowl onto the steamer**(failed due to motion prediction misalignment).

Lift the dish (failure): There is a **green dish** on the **unseen table** in front of the **unseen cupboard**. The robot is instructed to lift the dish using both arms. The robot needs to: (0) **align the grippers with the edge of the dish**, (1) **secure its hold on the dish**(failed due to gripper mechanical misalignment), (2) **lift upwards simultaneously**.

Real-world Execution
